

BOT DETECTOR BOT

WHITEPAPER

V1.0

What is Bot Detector Bot?

Here at Bot detector bot we will provide a ground breaking utility for all DeFi users! Investors will have premium access to a unique tool which the team has previously developed and proven for Bep20 bsc chain!

Why are we developing this?

The reason for this unique utility in which we speak about is to provide a fully custom developed telegram bot which allows defi lovers new and old to check the amount of multi wallet users that have botted / sniped a project. This allows investors to have key info regarding whether a project has a safe level of multi wallets.

The reason the team chose to launch this product on ERC20 was due to the increase in demand and also the gap in the market for such a unique and sort after product.

BOT DETECTOR BOT GOALS

SECURE ENVIRONMENT

Provide a safe and transparent environment for traders

WRITE A NEW HISTORY

Become one of the game changers in the scene.

MAKE MORE SAFE INVESTMENTS

This tool will give you more insight into projects you want to invest in

DELETE SCAMMERS

Delete scammers that keeps farming investors with their multi-wallets

How does the ecosystem work?

This bot is being used effectively on bsc with 2,000+ of uses per week, with the amount of users who will want to use the bot , we can see good numbers of people joining our social media per day. We will also be putting banner ads up on the bot which people can pay to advertise their own coins as traffic on the bot continuous to rise. The funds generated will be used for buyback, marketing and project development.

You will be required to hold a minimum of **0.1%** of BDB to use the custom bot. This ensures that holders will be rewarded in having a steadily increasing token price!

BOT DETECTOR BOT ECOSYSTEM

HOLDERS

Can take advantage of the increased amount of people owning the token.

BOT USERS

Required to hold at least 0.1% of the supply.

TRADERS

Swing the chart while some are buying for bot and some are holding

TOKENOMICS

The total supply is **1 Million**. With a **4% max wallet** (40,000 tokens) and a **4% max transactions** (40,000 tokens)

We have **5% tax** for both buys and sell transactions. The following will explain the breakdown of tax and where it would go:

MARKETING

This would be used for future marketing, buy backs and some development funds as well.

LIQUIDITY

A 1% liquidity tax is deducted every transaction this will increase our liquidity over time creating a more stable floor

Project Disclaimer

Just because a project has a high level of multi wallets does not mean it won't do well in the same way if there's a low level it doesn't guarantee safety of the project. You must do your due diligence at all times!
